## DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 26-29, drawn to an energized fluid, classified in class 426, subclass 66+.
  - II. Claims 30-41, drawn to a method of treating a fluid with an electrostatic device, classified in class 204, subclass 164.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown:
  - (1) that the process as claimed can be used to make other and materially different product or
  - (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).In the instant case the product as claimed can be made by a process with an electrostatic device of different structures than the claimed electrostatic device.

3. A telephone call was made to Attorney G. Schultz on January 21, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
